

INAR provides cutting-edge research on climate change, air quality, biogeochemical cycles and ecosystem processes. It hosts 10 of the highly cited geoscientists in the world, world-class university education, and leads international environmental programmes and spin-offs in research infrastructure and aerosol technology.

INAR

**INSTITUTE FOR ATMOSPHERIC AND
EARTH SYSTEM RESEARCH**

Our World requires knowledge-based solutions
that overcome national borders.
INAR is showing us the way.

GlobalSMEAR

SMEAR

GlobalSMEAR (Station for Measuring Earth surface -Atmosphere Relations) is an initiative towards an integrated Global Earth observatory for continuous, comprehensive environmental information, data services, and training from a local to a global network.

Director Academician Markku Kulmala
