

Knowledge growing from a boreal forest:

SMEAR II long-term research station turns 25

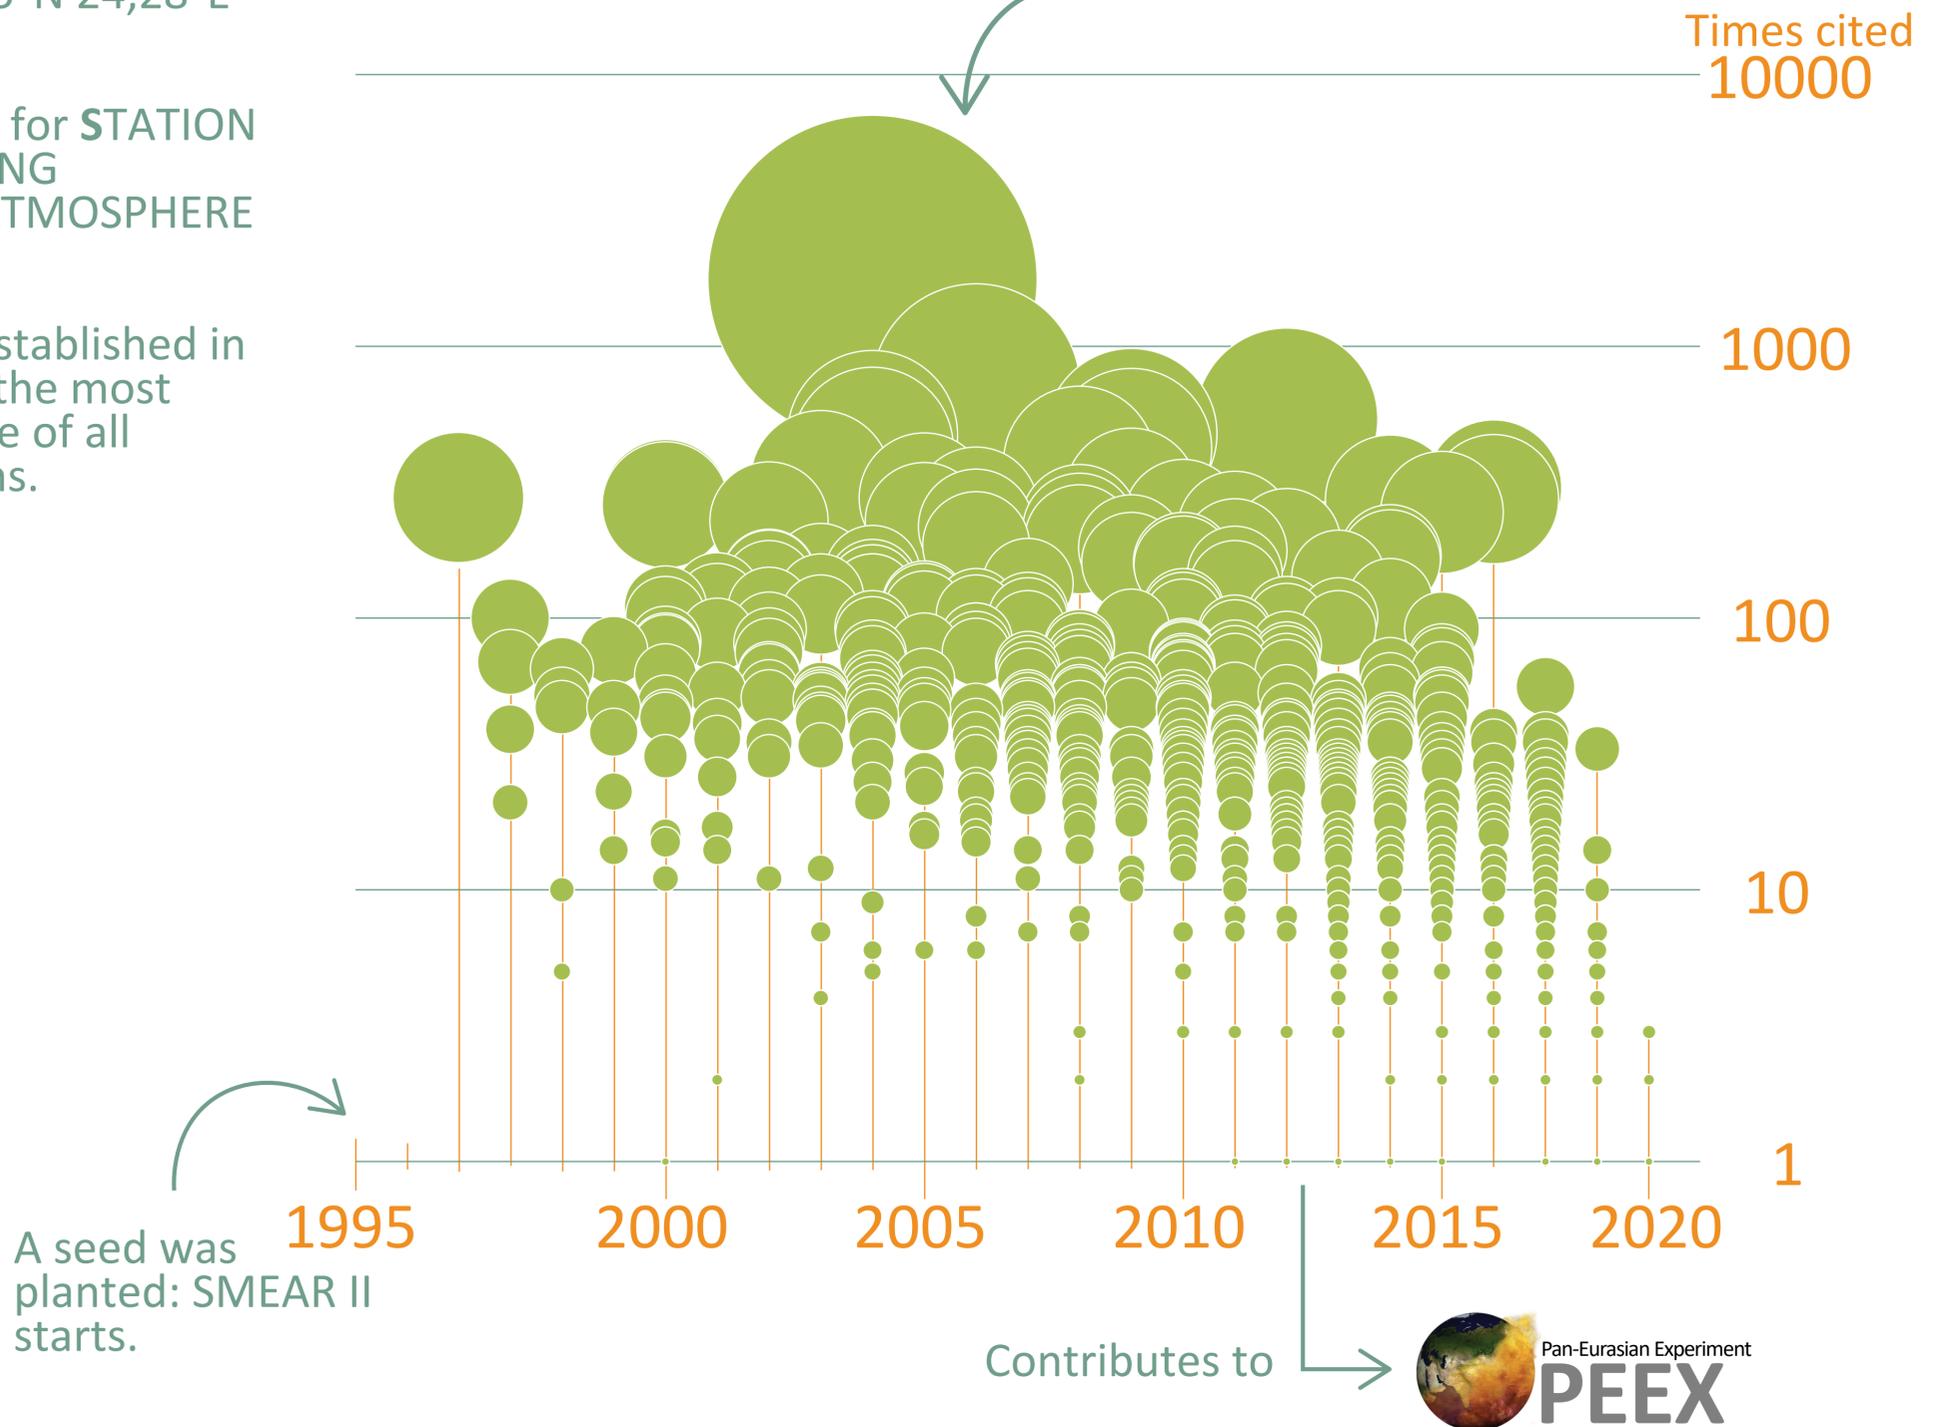

FINLAND 61,85°N 24,28°E

SMEAR stands for **STATION FOR MEASURING ECOSYSTEM-ATMOSPHERE RELATIONS**.

SMEAR II was established in 1995 and it is the most comprehensive of all SMEAR stations.

Each dot is a peer-reviewed scientific paper that uses SMEAR II station data. Its size and position is proportional to the times the work has been cited

The bibliographical data was retrieved using WebOfScience and Scopus (for SMEAR II), and Google Scholar (for FI-Hyy) as on 16.8.2020. 743 records. List is not exhaustive. Interactive visualization of this data set can be accessed at "public.flourish.studio/visualisation/3509469/" and "public.flourish.studio/story/521098/".
