HELSINGIN YLIOPISTO HELSINGFORS UNIVERSITET HYPE HELSUS

MOOC pro's and con's

from the Una Europa Online Community Event
29.1.2025

- **Strengths:** wide reach, flexibility in time and location, accessibility, free of charge
- **Weaknesses:** low level of interaction, high dropout rates, no support from teachers or peers, how to make sure the knowledge is internalised, limited options for evaluation, differences in recognition between universities, no space for extra studies in degrees
- **Opportunities:** continuous learning, intercultural learning, democratising access to education and expertise, to connect with other activities, can be used as learning material in other studies, one tool in a bigger toolbox of education, collaboration and co-creation
- **Threats:** misuse of AI, misuse of courses to gain easy ECTS, disconnection from local context, budget cuts in in-person and interactive teaching
