PEEX seminar (22 April) at 4th ACCC Impact Week 2025

 The Ukrainian Joint Meteorological and Hydrological Scientific Society (https://umhs.org.ua/) was established on March 24, 2017 by the decision of the 1st All-Ukrainian Hydrometeorological Congress.

The purpose of the Society is to protect the interests of its members in the implementation of their professional activities in the field of hydrometeorology (meteorology, climatology, hydrology, oceanology, agrometeorology, hydrography, physics of the atmosphere and ocean, atmospheric geophysics, etc.) and related industries, comprehensively promote the development of hydrometeorological practice and science, promote their achievements and role in society, expand public awareness of research in the field of hydrometeorology, as well as related areas of science, technology, production and public life. The Society's members are over 100 scientists and teachers, employees of the National Hydrometeorological Service, and students.

The objectives of the Society are:

- 1) Comprehensive promotion of the development of fundamental and applied research in the field of hydrometeorology and other related areas of science and technology, implementation of research results into practice;
- 2) Popularization and propaganda of hydrometeorological knowledge and scientific achievements in various areas of hydrometeorological science and practice, their role in society, publication of relevant scientific journals, bulletins and scientific monographs, textbooks, manuals, brochures, etc.;
- 3) Holding scientific and practical conferences, symposiums, seminars, etc.;
- 4) Providing assistance to members of the Society in improving their qualifications, including microqualifications through internships in leading industrial, educational and scientific institutions in Ukraine and abroad, publication and implementation of scientific works, implementation of inventions and innovative proposals, participation in the work of national and international forums, etc.;
- 5) Monitoring compliance with the level of WMO qualification requirements necessary for professional activity in the field of meteorology, climatology, hydrology, oceanology, agrometeorology, hydrography, physics of the atmosphere and ocean, atmospheric geophysics, etc. and interaction with management bodies in the field of hydrometeorology, institutions of professional and higher education on this issue.

The objectives of the Society are:

- 6) Providing scientific and methodological assistance in the development of curricula and teaching of hydrometeorology and special hydrometeorological disciplines in higher educational institutions;
- 7) Participation in the development and strengthening of scientific ties with foreign and international meteorological societies;
- 8) Development of ties with other scientific societies and associations of the country on issues of hydrometeorological science and technology and participation in joint programs;
- 9) Participation in conducting scientific and technical hydrometeorological expertise, in the development of regulatory documents, etc. in the field of hydrometeorology, the use of the latest technologies for monitoring the state of the environment;
- 10) Participation in the preparation of project applications and the implementation of domestic and international educational and scientific projects in the fields of education and natural sciences;
- 11) Presentation of initiatives on the adoption of legislative acts on issues within the competence of the Society.

During its existence, the Society held the two All-Ukrainian Hydrometeorologic al Congress, participated in the preparation and holding of two international scientific and practical conferences on climate services and climate education.

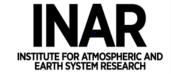

The Society participates in two international Erasmus+ educational projects as a member of the consortium (DOMANI project) and an associated member of the consortium (CLIMED project).

In April 2024, the Memorandum of Understanding on Cooperation with the international scientific program PEEX was signed.

Now the Society seeks to join the European Meteorological Society.

I appreciate your attention!
